XYZ Telecom – Fixed Wireless Service (FWS)

Connect your end user's premises to your point of presence, utilising class / apparatus licence radio networks to deliver high-speed data access within XYZ Telecom radio coverage areas. Quick and cost-effective solution option to consider when laying physical cable in the ground is cost prohibitive, eliminating regions with digital divide with reliable highspeed wireless connections. Provide backup to physical connections when disruption to mission critical services is not an option.

Extensive coverage

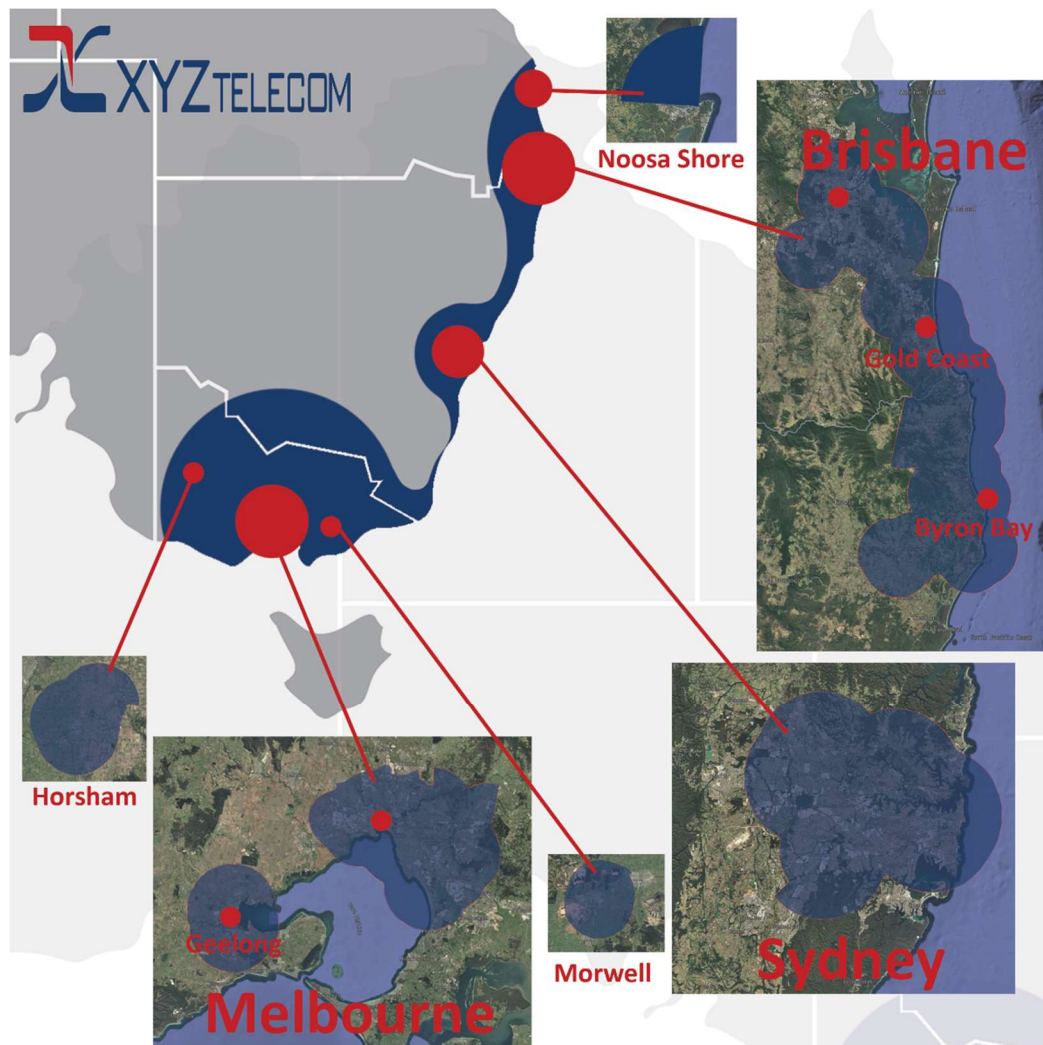

Fig.1 XYZ Wireless Coverage

XYZ Telecom FWS Highlights

- Range of bandwidth options: 50Mbps, 100Mbps, 250Mbps, 500Mbps and 1Gbps
- Distance based pricing, giving you the benefit of cost-based pricing
- Primary and backup usage pricing
- Access resiliency pricing options

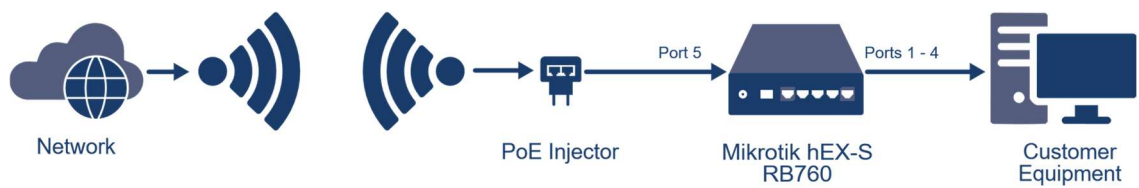

FWS Data sheet for the E-Line Service Type

Related Documents	XXXXX
Service type	XXXXX
Service Speeds	50Mbps – 1Gbps
UNI Attributes (Aggregated Head-End)	
Interface type	1000Base-X
Access Type	SMOF Fibre type
Access availability target	99.
Frame Formats	IEEE Std 802.1Q (0x8100)
UNI MTU Size	Jumbo 9000 bytes
UNI Service Multiplexing	Yes (>=1 EVC associated with the UNI)

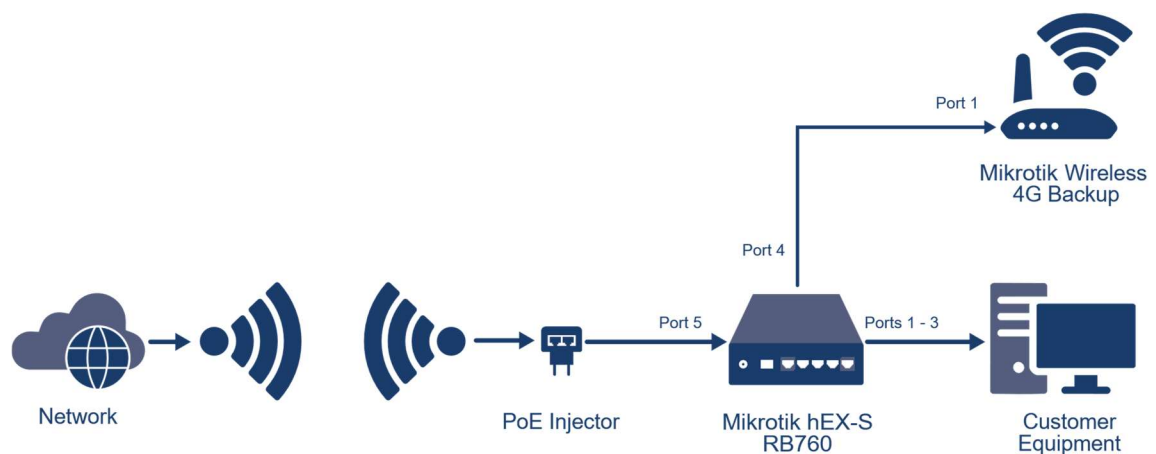

FWS Connection Detail

For FWS services with a committed speed of 100Mbps or less.

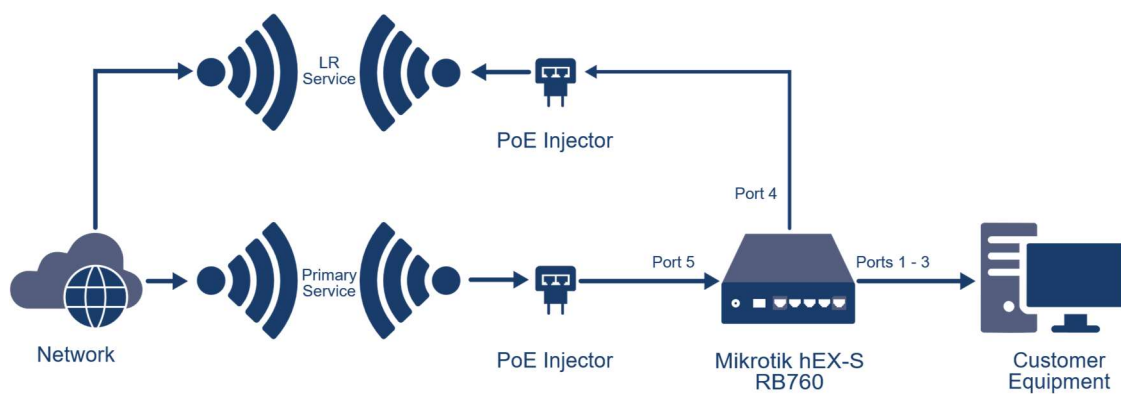

FWS <= 100Mbps

FWS<=100Mbps with 4G Backup

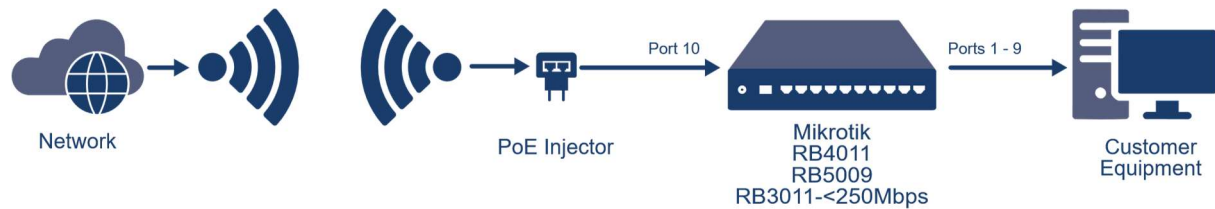

FWS<=100Mbps with LR Service

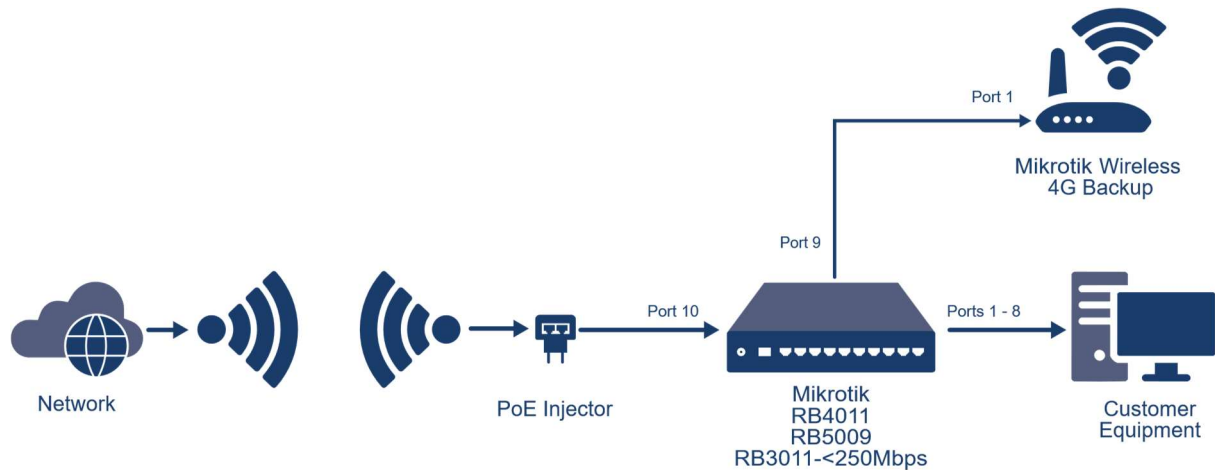

For FWS with committed speed of greater than 100Mbps

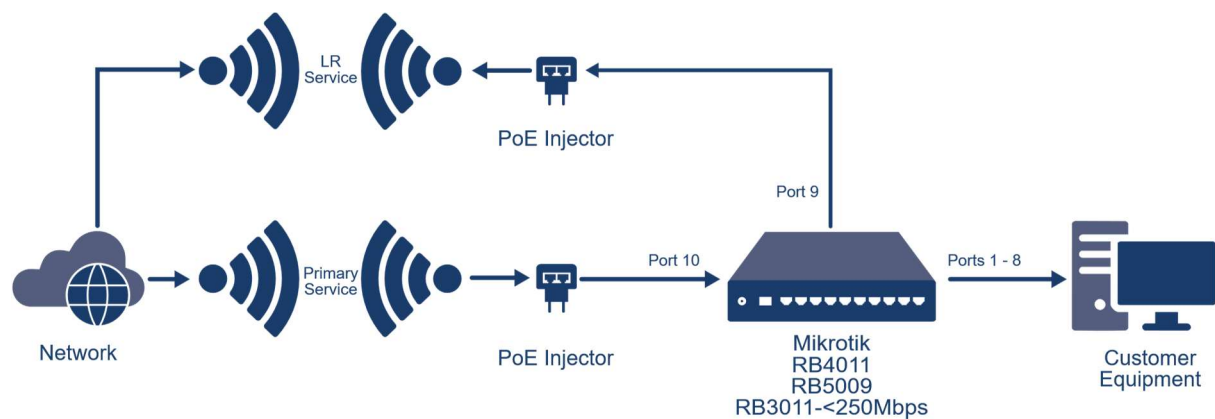

FWS > 100Mbps

FWS > 100Mbps with 4G Backup

FWS > 100Mbps with LR Service
